

Prevail

Concentrated Power Wash

Aleva's Prevail Power Wash is the multi-tool of powerful detergents. Use Prevail for your most demanding cleaning and degreasing needs. Use it with or without a pressure washer on automobiles and trucks, tools and machinery - anywhere you need powerful, reliable cleaning. No matter the size or scope of your cleaning needs, our highly concentrated formula helps control costs and greatly reduces cleaning time.

Scrub free.

High powered dispersants and surfactants in our proprietary formula eliminate the need for scrubbing, completely removing all sorts of grease, grime, and soils. Great for car bumpers and grills, Prevail also tackles gummed-up, oily tools and machinery.

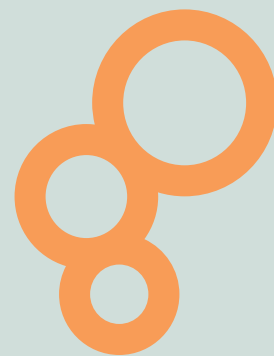

Less is more.

This highly concentrated formula requires only one to two ounces of product per gallon of water. You'll get great foaming and immediate dispersion of grit and grime. Our customers love putting us to the test and are amazed at how long a gallon of Prevail can last.

Gentle as water.

Our alkaline cleaner is gentle on aluminum - which reduces the need for subsequent acid washing and is safe on most trim. Plus, restoring agents attack oxidation and brighten metal surfaces to their former glory. Prevail is biodegradable and safe for daily use.

Prevail

Concentrated Power Wash

Product Information & Usage

Prevail Power Wash is a superb alkaline cleaner and degreaser that's safe for most surfaces. Brake dust, soot, grime, and soils are quickly dispersed (perfect for engines and machinery, tools, and work surfaces). Use in conjunction with a pressure washer or make a simple solution for use with a sponge and bucket.

Directions: The preferred method of application for removal of heavy soils and automotive brake dust is through a hot water pressure washer. Set the soap control knob on the pressure washer to dispense two ounces per gallon and apply with broad sweeping strokes, paying special attention to heavily soiled areas. Rinse thoroughly with the pressure washer for a clean, film-free surface. To use Prevail as a conventional degreaser, add 2 ounces per gallon of water (15 mL per Liter) in a bucket or preferred container. Apply soap solution over the entire surface and allow to penetrate soil and oils/grease. Gently agitate or scrub if desired. Rinse with a water hose or similar apparatus. Prevail may be used as a stronger solution for degreasing and removal of soot, grime or brake dust. Simply dilute with ten to twenty parts of water and apply through a pump-up sprayer or other suitable device. This is an excellent method for removing caked on or sticky residue and grime, including bugs on automotive windshields, bumpers and grills. Just spray the affected areas with the stronger solution of Prevail and then wash the surface or vehicle per normal procedure. Never apply this material without dilution. Do not begin washing any vehicles or other delicate finishes which have been left in the sun. Hot surfaces (especially aluminum) should be cooled by a quick application of clean water before applying Prevail.

Warning

Hazard Statements

H316 Causes mild skin irritation.
H319 Causes serious eye irritation.

Classification of the substance or mixture

OSHA HCS 2012
Mild Irritant (Skin)
Eye Damage/Irritation 2A (Irritant)
Label Elements
OSHA HCS 2012

Prevention

P264 Wash hands and skin after handling.
P280 Wear eye protection and/or face protection where applicable.
